FLEX DEVELOPER

Demasys is searching for a FLEX Developer to join our team and help us develop software of a highest quality. We offer you a opportunity to work in a company with 25 years of experience in designing and maintaining on-board communication systems. Televic Rail is a leading supplier for Passenger Information Systems, Entertainment Systems and Infotainment Systems.

Its Mechatronics Division provides for various types of on-board control systems, but also bogie monitoring systems. Altogether more than 20.000 rail cars are fitted with Televic Rail equipment worldwide. (China, India, UK, France, ...)

Its headquarters is located in Izegem, Belgium. However, Televic also has a plant in Bulgaria with a growing R&D force to work on new innovative solutions for the future. In order to grow our competences in database design and interfacing, together with User Interface design, we are looking for motivated people who want to grow with us and establishing these two competence centers in Plovdiv, Bulgaria.

Since the R&D team has built the base on top of the following technologies, we are looking for a developer who will have the following responsibilities and experience:

Responsibilities

- Design and develop software products following established and proven criteria,
- Work with the team members on improving the product in all possible terms,
- Contribute to the team's knowledge, experience and expertise so as to raise team's efficiency.

Required Skills and Experience

- User interfaces
- Flex 4
- Actionscript 3
- C#
- SQL Server 2008

The following skills will be considered an advantage:

- HTML5
- CSS
- JQuery + JQuery Mobile

What we offer

- An interesting and challenging job,
- Cozy environment with smart people around you,
- Dynamic opportunity for professional growth,
- Industry-leading remuneration, established bonus scheme and many other benefits.
