

QUALITY INSPECTOR

Job description:

The quality inspector is in charge of executing inspections for different part/sub-assemblies according to the directives given by his responsible, the rules of the art and the process he was trained for.

The main inspection operations are:

- Realize inspections during manufacturing phases and incoming inspection in warehouse
- Realize interchangeability jig test (mechanical),
- Realize the whole or a part of final inspection of the on-site manufactured products,
- Establish and/or validate the different required inspection records.
- Manage the inspections tools

Responsibilities:

- Performing inter-operations and final inspections in accordance with applicable procedures and instructions, inspection and shipment schedules as well as his hierarchy's directives,
- Formalising any issue or non-conformity and checking its closure,
- Establishing and/or validating the different required inspection records,
- Ensuring the completeness of the traceability and shipment dossiers, by using customers tools when necessary
- Ensuring the preservation of the product during storage and/or handling,
- Reporting to his hierarchy, the issues and dysfunctions encountered (and proposing the solutions, he foresees).

Requirements:

- Engineering Degree – at least Bachelor Degree in Electronics, Industrial Engineering or Mechanical Engineering preferably;
- Excellent command of English language – oral and written;
- Excellent communication skills and positive attitude;
- Quick learner, proactive, ready to work on his/her own and in a team;
- Ability to work under pressure and to keep self-control;
- Autonomous (including fast adaptation and willingness for self-learning);
- Computer literacy- MS Office - Excel and Power Point;
- Work with high reactivity and with willing to solve problems (finding solutions)

- Flexibility regarding the working shifts (early, day and late shift)
- Able to analyses and explain clearly a problem
- Availability to be trained abroad

Would be count as an advantage:

- Knowledge on quality systems - ISO 9001, EN 9100 – is a serious advantage
- Knowledge of quality tools for problem solving (A3 report/8D report, Ishikawa...)
- Internal auditor qualification – considered as a plus
- FAI (First Article Inspection) experience considered as an advantage

We offer:

- Excellent working conditions and possibility to be part of and develop professionally in a company that meets the highest working standards in the aviation industry;
- A competitive compensation and benefits package and a unique opportunity to grow in an international environment.

We highly appreciate your interest and each application will be considered with strict attention and confidentiality but only those selected for an interview will be contacted.
