

## A TRACK TO SUCCESS, THE “N+I” PACKAGES FOR INTEGRATION

One originality of the “n+i” organization is to help the foreign students toward the success in offering them packages for integration which are very good trump cards for “success”.

**PIC**

### The package for cultural integration

A complete welcome programme with a personalized assistance from the minute of arrival in France lasting during the full stay.

**PIL**

### The package for linguistic integration

Top enable beginners (or not) in French language to get ready before the start of the programme and to boost their discovery of French culture.

**PIM**

### The package for methodological integration

It is a period of cultural and language adjustment which allows students to gain confidence and also learn about French teaching methods.

### Pre master package

The premaster is a mix in one package of the three packages PIC, PIL, PIM which precede the master’s studies in France.

## WHY “N+I”?

“n+i” is a unique initiative of the French postgraduate Engineering Institutes with French companies. It is a non-profit making organisation aiming at training multilingual engineers able to work on international projects involving a multicultural environment.

### Master’s degree in Engineering in France

The Master’s degree is delivered by one of the 70 Grandes Ecoles-elitist engineering colleges or universities. Most of the colleges are associated with world class research labs and R&D expenditure remains amongst the highest in the world.

### The “n+i” advantage: assistance from enrolment right up to graduation

“n+i” offers a complete and original package range of personalised services to ease students’ integration into the French system.

“ Lorem ipsum dolor si elit, sed diam nonnum labore. Lorem ipsum dolor si elit, sed diam nonnum labore. (18 mots) ”
