Your main responsibilities:

- Maintenance and technical development public cloud (Azure, AWS) and private cloud (RedHat OpenShift) infrastructure services
- Development of infrastructure as code (IaC) & design infrastructure blueprints
- Development of IaC CI/CD pipelines
- Development and deployment of cloud projects including, build configs, deployment configs, routes, container images, services, secrets, storage, network
- Change, configuration, incident & problem management in context of an agile cloud setup
- Delivering input & metrics for SLA & Service Management (reports, improvements)
- Suggesting platform improvements, recommending process improvements
- Evaluate new technology options and vendor products
- Develop, improve and maintain monitoring solutions for developer teams
- Develop and maintain technical cloud service catalogs (self service catalog) for development teams
- Develop and maintain access management for development teams

Your qualification:

- Strong background in Linux/Unix Administration primary in Azure
- Expert knowledge and experience with Linux container technologies
- Solid understanding of Linux based networking, common network protocols and services
- Ability to use a wide variety of open source technologies and cloud services
- Experience with container platforms (Azure, OpenShift, AWS) in production environment
- Solid experience as a DevOps Engineer in a 24x7 availability context, including automation & configuration management
- Ability to analyze and resolve complex infrastructure, platform and application incidents
- Familiar with agile methodologies (DevSecOps, Kanban, Scrum, ...)
- Infrastructure provisioning with Hashicorp Terraform for Azure, AWS, OpenShift, VMWare
- Knowledge of YAML, JSON, TOML in combination with API based provisioning and automation
- Experienced with Git based workflows & artefact repositories (JFrog Artifactory)
- Scripting & automation skills (bash, python, ansible)
- Development of Jenkins pipelines using Maven, Gradle, npm & groovy
- Good understanding of Security standards & practices (TLS, certificates, encryption, IAM, ...)
- Experienced usage of system monitoring/logging/metrics & creation of dashboards

Your key strengths:

- Passion for learning new skills
- Focus on details
- Drive for results
- A strong team player

Our offer:

- Very stable work environment, as part of large Banking and Insurance Multinational Group
- Flexible work program, respecting your own private time
- Standard working time - 8 hours/day
- Attractive remuneration package
- Remote work possible
- Additional health insurance with coverage for dental services
- Food vouchers
- Exchange of experience and training with international professionals, as a premise for personal development
- Career development opportunities
- German language courses
- Team building events held both in Bulgaria and Europe
- Great workplace, office location close to the Plovdiv city center

Are you willing to join our Team? Apply today to be considered for this great opportunity!
