Back-end Developer

Who are we?

trio-group is one of the largest marketing agencies in Germany. Among our customers are BASF, bigFM, Radio Regenboden, 5 am Tag e.V., GELITA AG, Limbach Gruppe SE, RUF | Betten and Volkswagen Bank.

As part of the trio-group, Trio-Interactive International creates web applications, smartphone applications, interfaces and online stores.

As a Back-End developer in Trio-Interactive International you will be able to work on a wide range of projects each year, you will also be able to develop your professional skills while working in a constantly evolving and growing company;

Who are you?

- Someone who has a trill for working on large-scale projects that offer very different challenges, exciting and interesting tasks;
- Someone who loves working in high-productive, unprejudiced professional team and friendly atmosphere;
- Someone who values collaboration and honesty;
- A person who is proactively looking to learn new skills, evolve, and become better as this is a core characteristic of everyone on our team.

We're looking for a mid to senior level developers with:

- Solid experience (at least 3 years for mid, 5 years for senior) in building web sites and web applications with PHP 5.x/7.x (incl. OOP) and PHP MVC frameworks (Symfony, Laravel);
- Experience in CMSs (Drupal, WordPress, Typo3). We'd prefer Drupal experience and it will be considered as a strong advantage, but also we are open for PHP dev looking for a change of scenery;
- Experience with fundamental web development technologies (HTML, CSS, JavaScript, AJAX, JSON, HTTP) is a must;
- Working knowledge of Linux commands and basic Bash scripting;
- Experience with API technologies;
- Experience with relational databases (MySQL), database design, and performance optimization;
- Experience with version control (preferably git);
- Excellent understanding of Web application security;
- Teamwork experience;
- Good command in English- ability to speak, read, write and understand English effectively;
- Internal drive to learn, improve and succeed.

An advantage would be (nice to have but not required):

- Experience with Drupal (preferably Drupal 7/8);
- Experience with React, Vue and other JavaScript frameworks;
- Experience with Agile development process and Jira;
- German language.

Your responsibilities:

- Plan and implement innovative web sites and portals with Drupal;
- Improving and maintaining existing Drupal projects;

- Integration with external services and solutions (APIs);
- Keep track of the currently assigned projects and tasks;
- Testing and monitoring your own code;
- Be up-to-date with the newest technologies and best practices;
- Contributing to the overall brainpower of the team.

What we offer:
- Competitive salary and benefits (Refreshments and fruits at our office, additional health insurance, Pulse Fitness card);
- Develop your professional skills while working in a constantly evolving and growing company;
- Work with some of the best and the brightest professionals;
- Excellent office in a great location (At the center of Plovdiv, close to Roman Stadium and Kapana).

If you believe you meet our requirements (even if you don't cover all of them) and you are as excited as we are, we would love to hear from you!

The position is based in Plovdiv. We will not consider remote candidates.

All applications will be treated in strict confidentiality. Only shortlisted candidates will be invited to an interview.
