

Senior Front-end Developer

Shelly Group is an innovative company founded in Bulgaria to make life easier for modern people. And we are achieving it, with a team of young talented developers, devoted to producing competitive and easy to use products that changed our world for the better.

Our devices are inspired by the end user's dream to live a calmer life is coming true.

Over the last few years, our team built a whole new trend in the Home Automation systems, Wearable devices and Health Care products. The company has grown into one of the world's leading manufacturers and sells its products in more than 100 countries.

Is this work for you?

If you want to create the next product for thousands of people worldwide?

If the job we offer is your hobby and you want to do it professionally?

If you are ready to think at any time, how can you improve your product?

Do you enjoy working with a team of exceptional hardware and software professionals?

If challenges are something that motivates you?

Then you are the right person and you will be extremely happy to fulfill your dreams.

We are looking for a Senior Front-end developer

Responsibilities:

- Develop web UI application used for device control
- Develop internal tooling used for maintenance and support of users
- Build complex interactive web and hybrid applications on mobile, tablet, and desktop;
- Responsibilities will include translation of the UI/UX design wireframes to actual code that will produce visual elements of the application;
- Develop new user-facing features;
- Build reusable code and libraries;
- Ensure the technical feasibility of UI/UX designs;

- Optimize application for maximum speed and scalability;
- Assure that all user input is validated before submitting to back-end;
- Collaborate with other team members and stakeholders;
- Contribute to all phases of the development lifecycle.

Requirements:

- Fluency or understanding of specific languages, such as Javascript and libraries like Svelte, SvelteKit
- Experience with React, Vue would be beneficial
- Linux operating system as environment
- Strong understanding of the web development cycle and programming techniques and tools.
- Focus on efficiency, user experience, and process improvement.
- Problem solving and verbal and written communication skills.
- Ability to work independently or with a group.

We offer:

Ready to Join the Shelly Revolution?
