

PRODUCTION ENGINEER

We're looking for a curious Production engineer

At Televic we are dedicated to providing innovative and reliable communication systems in 4 niche markets: Conference, Education, Healthcare and Rail. Televic Group enables the strategic ambitions of these Business Units by centralizing all HR, IT, finance, marketing, operations and procurement activities. Wherever communication needs technology, we are at work!

But for that technology to enable our customers to excel, we need a curious Production engineer. Why curious? Because curiosity not only makes for better teamwork, it also creates new insights and possibilities. Besides that, technological leadership and innovation drive everything that we do. So join us and help build the communication technology of tomorrow.

Working as a Production engineer:

- Resolve technical issues regarding production technology, products, and test systems
- Analyze detected nonconformities in the manufacturing process and implement measures to eliminate them
- Support the team in their daily activities related to assembly process and increase its efficiency
- Assists in the preparation of documentation related to the improvement of production and test processes
- Participate in the introduction of new products through collaboration with local NPIs
- Implementation of developed assembly processes in production and training the personnel
- Organize trainings to enhance the technical competencies of the employees in the production
- Coordinates with the test engineers for updates (software/hardware) of the test/programming systems
- Ensure annual internal calibration of the used machines, tools, and test systems
- Ensure regular support for presetting of the available equipment

Professional skills we're looking for:

- Technical university degree /Electronics and Electrical Engineering, Automation Engineer, Mechanical Engineering, etc./
- Professional experience on similar position in manufacturing and assembly - process/production engineering
- Good level of English language
- Very good computer skills
- Problem solving skills and analytical thinking
- Team player with effective communication skills
- Reading and understanding of technical documentation (specifications, drawings, schemes, models)

What's in it for you?

- A full-time contract at a company that has international success, but remains solidly rooted with Headquarters in Belgium as it keeps on growing
- Excellent working conditions and social policy
- Training and development opportunities
- The chance to work on state-of-the-art projects in a market that represents sustainability
- An environment driven by teamwork and the constant will to innovate
- The chance to deliver quality, because that's what we stand for
- A stimulating, no-nonsense mentality, with an eye for your unique talents and growth
