

Software Developers and Electronics Engineers

Did you know Broadcom is a Trillion dollar company?

Do you want to be a part of this multi-billion company and help us build the tech future together?

Broadcom further extends its presence in Bulgaria based on most talented engineers.

Do not miss the opportunity to join Broadcom now.

About us:

Broadcom, A leader IT firm in Bulgaria, is offering a unique opportunity to join the best in class team, developing the state of the art applications, offering you the best career opportunity.

Broadcom is a leading provider of innovative silicon, systems and software technologies that enable products which seamlessly bring people, information and digital content together. We offer a broad portfolio of capabilities and services including custom and standard product ICs, adapters, systems and software that are trusted by the world's best-known brands to power leading solutions in the storage and networking markets.

Well, we may not have our logo on the back of your iPhone or Android, but we design and manufacture the semiconductor (or chip) that is the brains of these powerful devices. Our chips can also be found in network switches, cars, gaming consoles,

computers and medical devices. Every time you post a thread, send an email, make a call with your mobile, upload a picture, download a file from the cloud – there is a 98,9% chance that you are using a Broadcom device that we, at Broadcom Bulgaria, participated in its design and development.

This is a golden opportunity to work at the most technological company in Bulgaria, directly with top engineers in Silicon Valley, Orange County, United Kingdom, Tel Aviv and beyond. Use your determination, creativity and motivation and join a best-in-class team developing cutting-edge applications. Our employees' passion for excellence and innovation is our most prized resource. If you share that passion – and want to be part of a company at the forefront of the communications revolution – we want to hear from you.

Software Developers and Electronics Engineers

Primary responsibilities include:
